

I commute three hours each day to and from work. XM Radio's weather and traffic reports are constant and up-to-date. The information it provides me is absolutely not available on any AM or FM broadcast. XM radio helps me get to and from work safely and efficiently. Most recently while on a Boy Scouts of America camping trip I was able to help in safely removing over 400 young people from a camp ground threatened by a tornado. Neither AM or FM radio had constant weather reports available. XM radio did.
